

4 Actionable Strategies to Build Buy-In for Your Data Projects

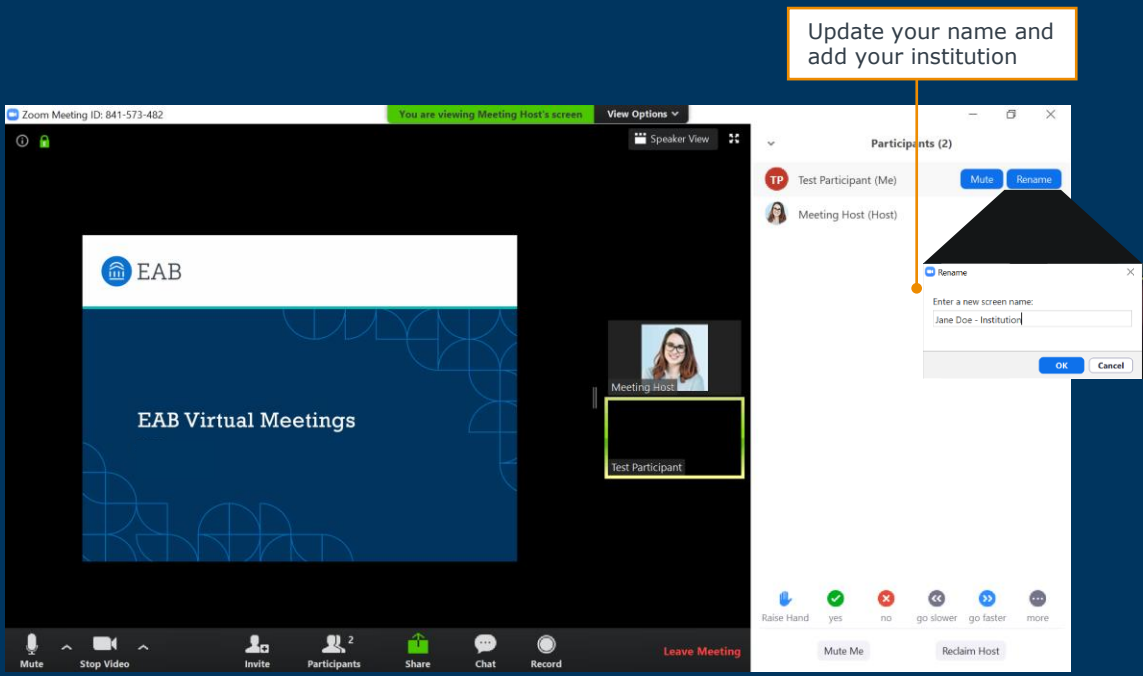

October 11, 2023

What's one thing you're looking forward to when this webinar is over? (work or personal!)

Update Your Name

Update your name and add your institution

Open Participants menu

Mic, Chat, and Nonverbal Feedback

Use icons to communicate answers and signals to presenter

The screenshot shows a Zoom meeting window with a presentation slide titled "EAB Virtual Meetings". The interface includes a top bar with meeting ID and status, a main content area, a bottom toolbar, and a right-hand sidebar. Callouts highlight the following features:

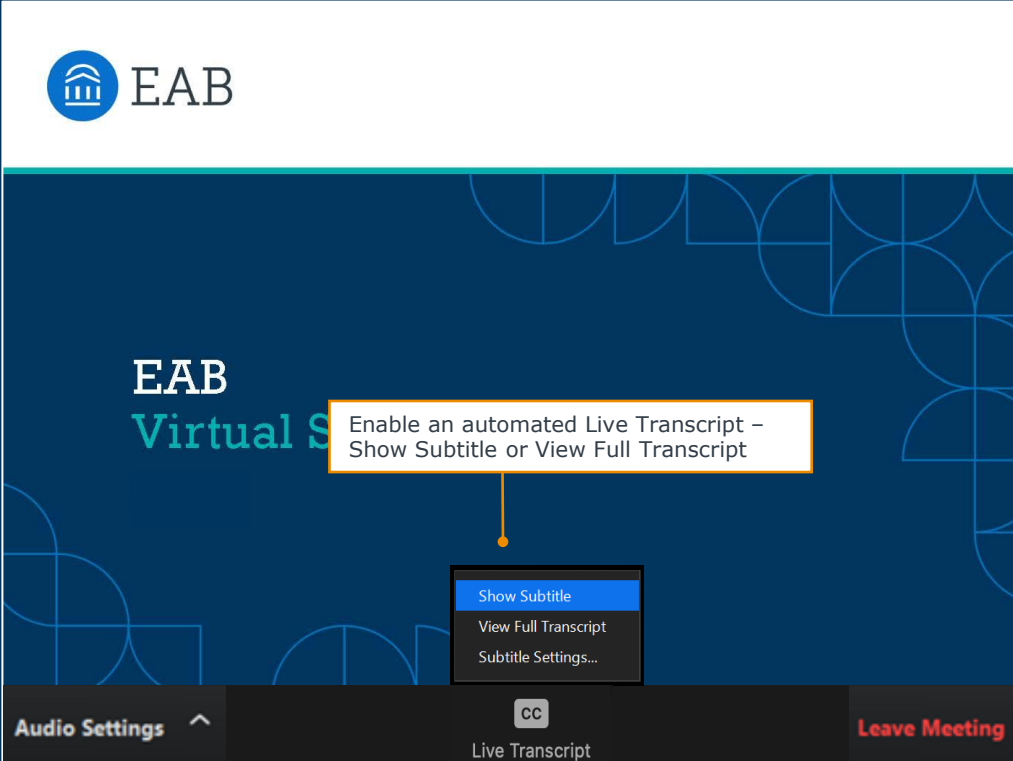

- Participants and Chat:** The "Participants" and "Chat" icons in the bottom toolbar are highlighted with a box and a callout: "Open Participants and Chat".
- Nonverbal Feedback:** The "Participants (2)" sidebar shows a "Test Participant (Me)" and "Meeting Host (Host)". Below them are icons for "Raise Hand", "yes", "no", "go slower", "go faster", and "more". A callout points to these icons: "Use icons to communicate answers and signals to presenter".
- Unmute:** The "Unmute Me" button in the sidebar is highlighted with a box and a callout: "Unmute to verbalize a comment".
- Chat Targeting:** The "Zoom Group Chat" section in the sidebar shows a "To:" dropdown set to "Everyone" and a "Type message here..." input field. A callout points to the dropdown: "Select whether you want to chat with everyone or a specific person".

Unmute to verbalize a comment

Open Participants and Chat

Select whether you want to chat with everyone or a specific person

Turn on Captions

The screenshot shows a Zoom meeting interface. At the top left, there is a logo for EAB (Education Access Board) consisting of a blue circle with a white building icon and the text 'EAB' next to it. Below the logo, the text 'EAB Virtual S' is visible. In the center, a yellow callout box contains the text: 'Enable an automated Live Transcript – Show Subtitle or View Full Transcript'. Below this callout, a dark grey menu is open, showing three options: 'Show Subtitle' (highlighted in blue), 'View Full Transcript', and 'Subtitle Settings...'. At the bottom of the screen, there is a dark grey bar with three main elements: 'Audio Settings' with an upward arrow, a 'CC' icon above the text 'Live Transcript', and a red 'Leave Meeting' button.

Strategic Leader, Data and Analytics

Lily Brennan

Strategic Leader, Data and Analytics

Four Actionable Strategies

● A Survey of Experiences

- 1 Creating Unlikely Strategic Partnerships
 - 2 Alignment Across Applications
 - 3 Addressing Genuine Gaps
 - 4 Inclusivity in Analytics
- Discussion and Questions

Quick Poll

1 Indicate the degree to which you agree with this statement:

I have a set of strategies to promote and elevate my data projects on campus.

- A. Strongly agree
- B. Somewhat agree
- C. Neither agree nor disagree
- D. Strongly disagree

2 **How would you describe your institution's engagement with your data projects?**

- A. I have both executive and peer investment
- B. I have a couple of consistent allies
- C. I need to advocate loudly to draw support for my initiatives
- D. Stonewalling has left me burnt out

Presentation Structure

1 We'll provide a strategic framework for you to apply in follow up

We'll characterize the core issue **2**

3 We'll provide a concrete example of the solution in action

Actionable Takeaways

Our primary goal is for you to leave with an awareness and a set of strategies that you can use when you go back to campus with a desire to promote and elevate your work.

A Tour of Best Practices

**Creating Unlikely
Strategic Partnerships**

**Alignment Across
Applications**

**Addressing
Genuine Gaps**

Inclusivity in Analytics

Four Actionable Strategies

A Survey of Experiences

Creating Unlikely Strategic Partnerships

Alignment Across Applications

Addressing Genuine Gaps

Inclusivity in Analytics

Discussion and Questions

Best Practice #1: Consider Strategic Partnerships at Your Institution

Use the first page of the worksheet to structure your follow-up work!

When applying this practice, focus on *one* of your analytical targets (enrollment, retention, etc.)

#1

When typically analyzing this outcome, are there any “constants”?

- Departments that are always part of the process?
- People who are always involved in sign-off?

#2

Are there any departments or people who could be involved but are not?

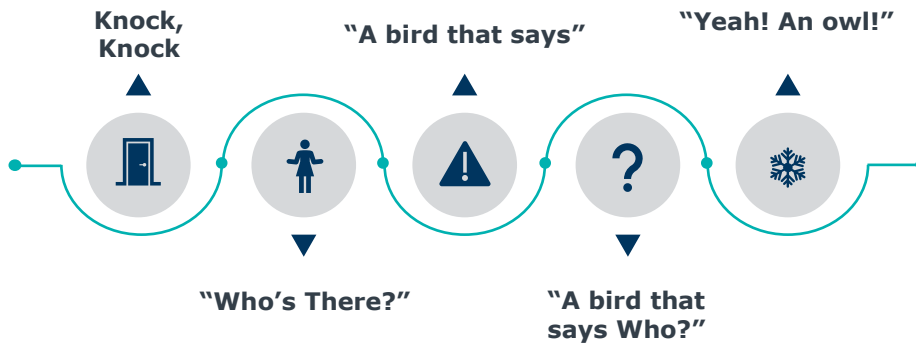

#3

Are there any departments or people with a vested interest in this outcome *who are not currently involved*?

Don't Be Afraid to Try Something New

Characterizing the Obstacle

The Strengths and the Weaknesses of “Familiar” Approaches and Strategies

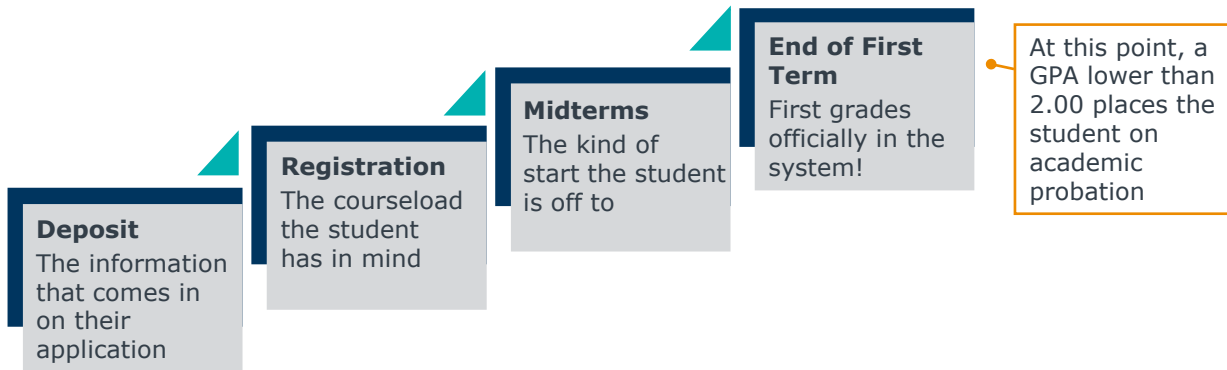

- Strengths
 - Individuals and departments are aware of *how* to contribute when the framework is familiar to them
 - Mechanisms may be in place that help you move from one step to the next more quickly
- Weaknesses
 - There is a limit to how much you can innovate while remaining inside the framework
 - When folks can assume how a project will go, they may have predispositions that inhibit their cooperation

Phase 1: Generating Valuable Insight for Student Success

Small, Residential, Public 4-Year University

Data Checkpoints: The Early-Stage Student Lifecycle

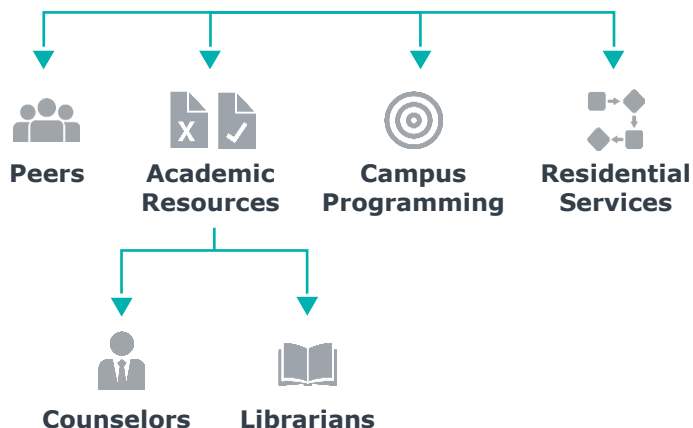

Student Success Obstacle	Clever Modeling Solution
<ul style="list-style-type: none">Students ending up on academic probation were dropping out at higher rates	<ul style="list-style-type: none">Instead of using it as a factor in the predictive model, use it as the <i>target</i> of the predictive model!

Phase 2: Identifying Where the Insight Translates to Action

▶ Librarian Mentor Opportunities

- **Familiar and Flexible Resources:** Academic resources are a blend, considering the main pillars of student experiences
- **Recasting a Current, Not New, Service:** Librarians are always available to help students with study and research skills
 - Created a list of students to proactively offer a librarian mentor to
 - Unique way to leverage not only the scores but the library's services as well

The Student Experience

Summary: Creating Unlikely Strategic Partnerships

Sometimes familiar problems have **unquestioned**, routine paths to solution

Reassessing your efforts with lateral thinking can unearth novel possibilities

When introducing novel solutions, **"add" at first, don't "replace"**— and measure and celebrate wins!

Four Actionable Strategies

- A Survey of Experiences
- 1 Creating Unlikely Strategic Partnerships
- 2 **Alignment Across Applications**
- 3 Addressing Genuine Gaps
- 4 Inclusivity in Analytics
- Discussion and Questions

Best Practice #2: Alignment Across Applications

Alignment Across Applications

1 Which key institutional data effort are you hoping to enhance? Applications can align for any number of purposes, so it's important to focus your efforts on one general task at a time.

Admissions Recruiting Enrollment Yield
 Accreditation/Consortia Reporting Institutional Operations
 Other: _____

2 What other applications at your institution may compliment one another?

_____ Rapid Insight

3 Pick one of the applications from the list above and identify where the strengths of one app can account for the weaknesses of the other. For now, this exercise is according to best of your knowledge. Later, you can reach out to a colleague who knows more about the application, too!

How _____ can Support: How Rapid Insight can Support:

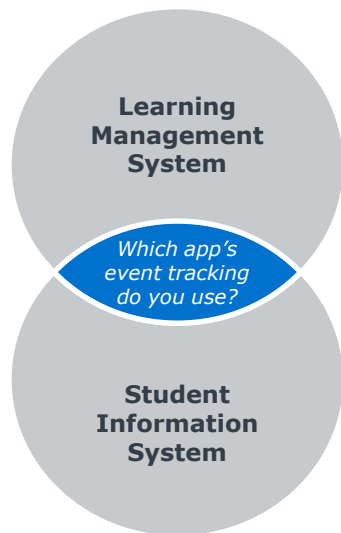

©2023 by EAB. All Rights Reserved. 2 eab.com

After the session, use the worksheet to help you consider alignment between Edify/Rapid Insight and other applications at your institution.

Best Practices for Using Many Applications

Characterizing the Obstacle

► Too many tools in the toolbox

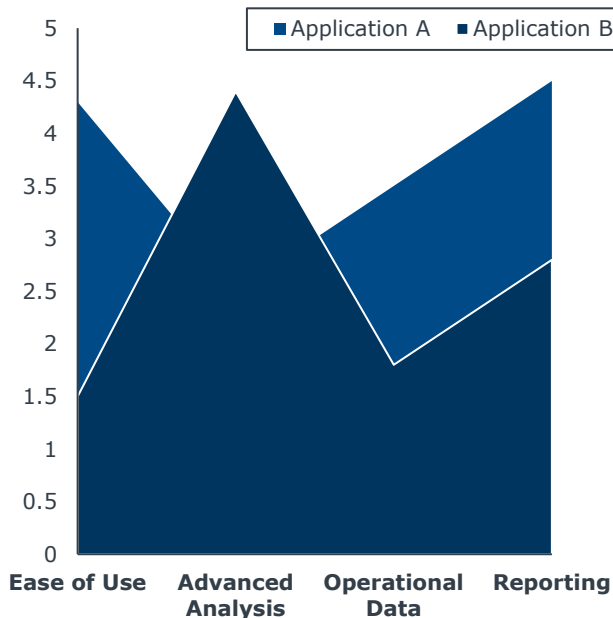

How do you know when to use which tool for what?

- Generally, no institution uses every single feature of any given application
 - It can be overwhelming
 - Multiple applications may provide the same information
 - Easiest to "go with what you know"

Finding Synergies Between Rapid Insight and Edify

Small, Public 4-Year Institution

Application Capabilities

Finding Synergies

Additional Platforms Introduced in Parallel

- More isn't always better but sometimes can create opportunity to use one app to round out another's functionality
- Staff pursued "synergies" between applications

Edify (Data Warehouse) and Rapid Insight (ETL)

Using both tools together allowed for an accurate and customized Enrollment report to be built and implemented quickly

Impact

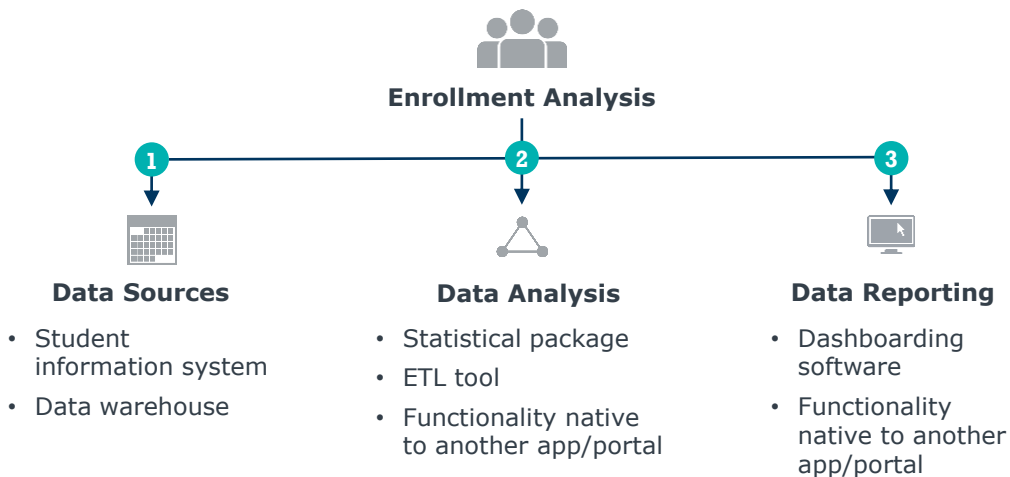

- Rapid Insight allowed users to make use of their Edify data quickly
- Using Edify data ensured the Enrollment report was trusted and accurate

Surveying Your Application Landscape

1 STEP 1 Take inventory

**Bird's-Eye View of Your Target—
"Which Apps Have *Anything* to Do with This?"**

Creating a Plan

2

STEP 2

Assess Strengths and Weaknesses

Edify (Data Warehouse)

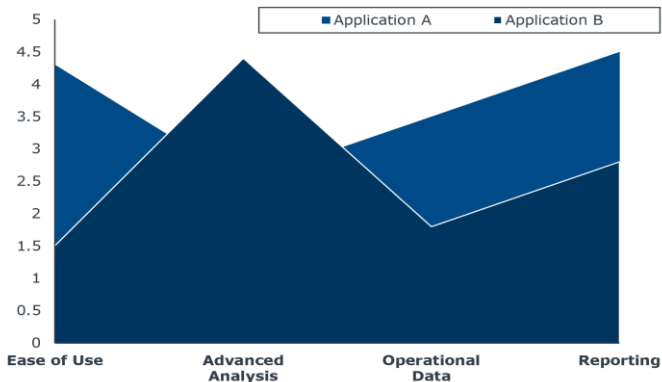

- Single source of truth
- Accurate and vetted data
- Data definitions

Rapid Insight (ETL)

- User friendly data access
- Web-based data sharing

Application Capabilities

This is a hypothetical example. Choose your criteria specifically based on the apps you are comparing.

Envisioning App Partnerships

3 STEP 3 Brainstorm Integrations

You Do Not Need to Be an Expert on Everything

Keep an open (optimistic) mind when brainstorming possible integrations

- Start with an app you know well so you can articulate its value
- Meet with experts on the other platforms where you suspect there could be a valuable partnership

Summary: Alignment Across Applications

Deciphering how tools will **serve your needs** can be difficult when many options are available

Evaluating the way applications **work together** can uncover opportunities for **process improvement**

Finding synergies between apps **can fill gaps** and **strengthen outcomes**

Four Actionable Strategies

- A Survey of Experiences
- 1 Creating Unlikely Strategic Partnerships
- 2 Alignment Across Applications
- 3 **Addressing Genuine Gaps**
- 4 Inclusivity in Analytics
- Discussion and Questions

Worksheet: Addressing Genuine Gaps

Addressing Genuine Gaps

Strategically addressing gaps in your data processes is a two step effort. First, you may need to search for gaps which are "filling" as simple inefficiencies. Then, the choice remains - which gaps should you work to address?

Finding Gaps

Use these prompts to guide your thoughts. Feel free to write down any gaps that don't fit in these categories, too.

 Desired resources that do not exist	 Current tasks which are workarounds	 Frequent requests which may hint at system shortcomings
---	---	---

Prioritizing Work

In most cases, there will be more gaps and inefficiencies than you can resolve with your allocated staffing. Use the following table to prioritize which gaps present the optimal cost to benefit ratio.

Gap	Barriers to "Filling It"	Level of End-user Interest	Alignment with Leadership Priorities

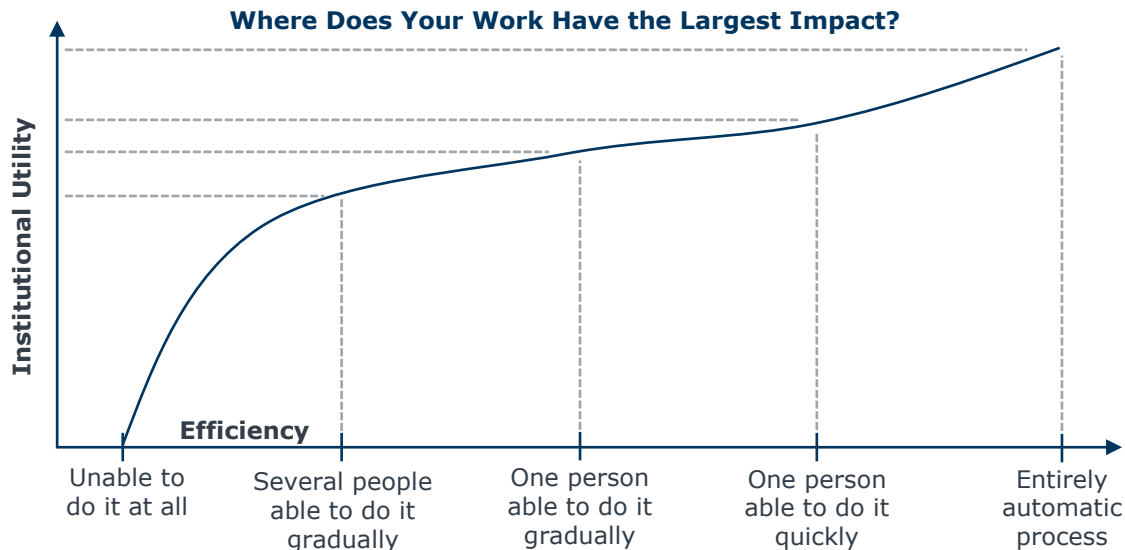

©2023 by EAB. All Rights Reserved. eab.com

After the session, use the third page of the worksheet to search for and address gaps in your data processes.

Stakeholders Can Spot Diminishing Returns

Characterizing the Obstacle

- **Improvements in Efficiency Do Not Need to Occur Incrementally:** Most RI users are able to go from “unable to do it at all” to “one person able to do it quickly” in one phase.
- **Focus on the Highest Level of Efficiency:** If you spend too much time (at first) trying to work on a marginal increase in efficiency, your work may be easier to disregard.

Spotting the Symptoms of an Operational Gap

Private, 4-Year and Graduate University

Ideal Scenario

When There Is Time

Actual Scenario

When It's Busy

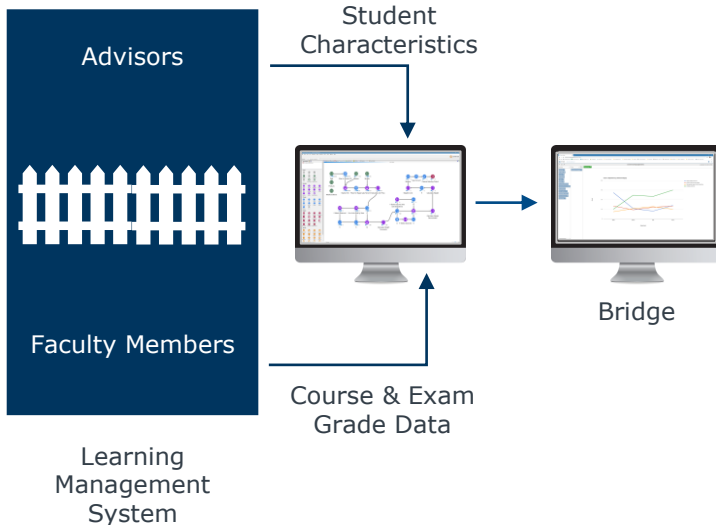

"Advisor asks student..."

- This became the call to action
- The LMS in use had limitations which necessitated *either* slowed meeting schedules *or* reliance on student impressions of their grades

Diagnosing (and Resolving) the Reporting Roadblock

The gap stemmed entirely from the LMS. It offered no direct path, which created a perfect opportunity for a high-engagement data project.

How You Can Use It Too

Two Critical Considerations

1

Finding Gaps

Needs Not Accommodated by Native Systems

- Routinely create a report bridging two systems
- Schedule automated tasks for routine data requests
- Test a hypothetical correlation that's holding up decision-makers
- Provide simple predictive resources for otherwise anecdotal processes

2

Prioritizing Work

Optimize Your Impact

- Most institutions will not want for data gaps to be filled
- Focus on the gap's three key characteristics
 - How much time will it take you to fill?
 - Do you need to learn new systems or skills to manage it?
 - How important is it to fill this gap?

Great Ways to Identify Gaps

Desired resources that do not exist

Current tasks that are work-arounds

Frequent requests that may hint at system shortcomings

Summary: Addressing Genuine Gaps

Inefficiencies are easier to live with than **outright lack of capability**

Identify disconnects and dead ends that obstruct strategic action

Start to **provide enabling analytic solutions**, and gradually you can direct the conversation with increased buy-in

Four Actionable Strategies

- A Survey of Experiences
- 1 Creating Unlikely Strategic Partnerships
- 2 Alignment Across Applications
- 3 Addressing Genuine Gaps
- 4 **Inclusivity in Analytics**
- Discussion and Questions

Worksheet: Inclusivity in Analytics

Inclusivity in Analytics

The following is an excellent way to begin thinking about your modeling project in terms of the departments and the "networks" associated with your outcomes. Beginning with this focus on "entities" which are valuable to your analysis will guide your efforts towards identifying departments and allies who can combine their localized subject matter expertise with your analytical capacity.

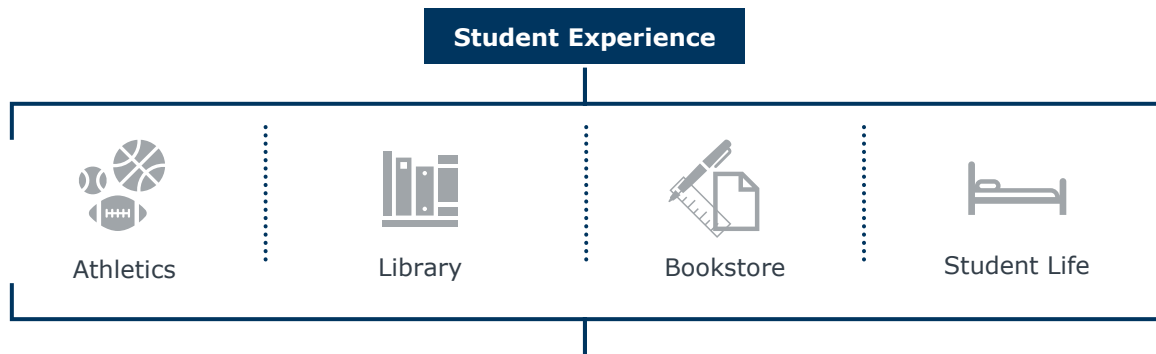

After the session, use the last page of the worksheet to model your data project.

Cross-Departmental Collaboration Is Critical for Success

Characterizing the Obstacle

A Variety of Perspectives and Expertise Improves Your Efforts

- Each department that impacts an admit or a student's experience has a view into what helps them succeed— factoring them in decreases the likelihood that you're missing out on valuable predictors
- Furthermore, each department has a unique way in which they can act on your results—inclusion primes them to operationalize your work

Holistic Analysis Leads to Holistic Benefits

Private, Liberal Arts College

Admit-to-Enroll Modeling

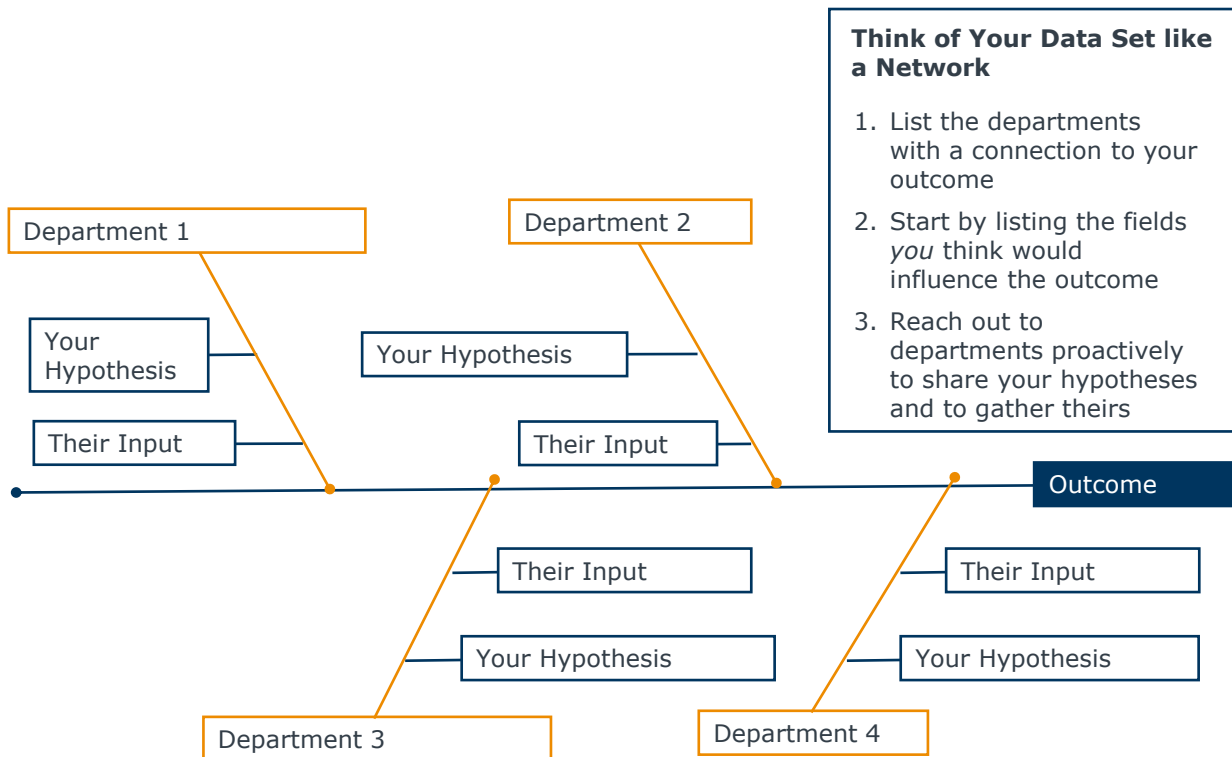

- **Director of Athletics**

Non-recruits were more likely to enroll because they were less competitively sought-after.

- **Data Dictionary**

A tool like Edify can help document the important findings established through your inclusive research and furthermore provide a centralized location for other stakeholders to access your findings.

Department-First, Attribute-Second Analysis Prep

Summary: Inclusivity in Analytics

Viewing your analysis with respect to **institutional entities** unveils potential partners

Meeting with departments **introduces their perspectives** and builds preemptive **support for your results**

Documenting your findings in a data dictionary can **improve access to information** for future analyses

Four Actionable Strategies

- A Survey of Experiences
- 1 Creating Unlikely Strategic Partnerships
- 2 Alignment Across Applications
- 3 Addressing Genuine Gaps
- 4 Inclusivity in Analytics
- Discussion and Questions

Closing Poll Questions

- 1** How was today's session?
- 2** Indicate the degree to which you agree with this statement:
After participating in today's session, I have a set of strategies to promote and elevate my data projects on campus.
- 3** Which of these strategies do you foresee being most helpful to you in the future?
- 4** Would you like to set up a support session or attend our office hours to further discuss these strategies?
- 5** Additional feedback or questions?

You will receive a follow-up email that will include a link to today's session materials.

THANK YOU!
