

Simplify IPEDS Reporting with Rapid Insight + Edify

IPEDS reporting is essential, but preparing submission-ready files can be time-consuming, technically complex, and prone to manual formatting challenges. EAB streamlines the process by combining **Edify**, **Rapid Insight**, and **pre-built IPEDS workflows** into a standardized solution that helps institutions transform prepared data into validated, fixed-width files ready for submission. Whether you're looking to modernize your reporting process or reduce the burden on institutional research teams, our solution provides a repeatable, scalable approach designed around the annual IPEDS collection.

How We Help

Prepare

Bring together your institutional data using Edify or your existing data environment.

Transform

Leverage pre-configured Rapid Insight workflows and built-in IPEDS schemas to automatically apply required formatting and validation.

Generate

Create submission-ready fixed-width files for each survey component and combine them into a single upload-ready deliverable.

Submit

Load your files into the IPEDS Data Collection System with confidence, reducing manual rework and formatting concerns.

Value of EAB Support

- 
 Reduce manual file formatting and repetitive tasks
- 
 Standardize the IPEDS reporting process across survey parts
- 
 Utilize pre-built workflows and IPEDS schema files maintained by EAB
- 
 Increase confidence in submission-ready outputs
- 
 Save staff time while improving consistency year after year
